PROFESSIONAL SUMMARY

Second-year B.E. Computer Science and Engineering student specialising in Artificial Intelligence & Machine Learning, with developing interests in cybersecurity, web security, API security, application security, AI security, and secure software development. Builds practical projects and develops hands-on cybersecurity capability through vulnerability-focused application work, security testing, and structured learning labs.

EDUCATION

B.E. Computer Science and Engineering (Artificial Intelligence & Machine Learning)

PPG Institute of Technology

2nd Year

PROJECTS

LOGIC LEAK 2.0 | Cybersecurity Learning Platform

- Built an interactive cybersecurity learning platform for identifying and fixing vulnerable code.
 - Developed a challenge-based flow: Login → Challenge → Find Leak → Explain → Fix → Earn XP → Progress → Next Challenge.
 - Implemented security challenges covering SQL Injection and business-logic validation vulnerabilities.
 - Built the frontend with React and the backend with Node.js and Express.js; used SQLite for application data storage.
 - Implemented JWT-based authentication, bcrypt password hashing, protected API endpoints, authorization checks, input validation, error handling, and progression controls.
 - Performed security regression testing for authentication, authorization, validation, and progression logic; managed development and documentation with Git and GitHub.
-

CYBERSECURITY EXPERIENCE / TRAINING

WAPT Internship / Practical Cybersecurity Training

- Practiced web application security testing using Burp Suite Community Edition, including HTTP request and response interception.
 - Tested for SQL Injection and assessed authentication and authorization controls, including IDOR scenarios.
 - Completed practical labs through PortSwigger Web Security Academy and TryHackMe.
 - Performed basic web reconnaissance, identified vulnerabilities, and documented findings.
-

TECHNICAL SKILLS

- **Programming:** Python, Java, C++, JavaScript, SQL
 - **Web & Backend:** HTML, CSS, JavaScript, React, Node.js, Express.js, REST APIs
 - **Cybersecurity:** Web Application Security, API Security, SQL Injection, Authentication, Authorization, Secure Coding, OWASP concepts
 - **Databases:** SQLite, SQL
 - **Tools:** Git, GitHub, VS Code, Linux/WSL, Burp Suite, TryHackMe, PortSwigger
 - **AI/ML:** Machine Learning fundamentals, Artificial Intelligence fundamentals
-

CERTIFICATIONS / LEARNING

Hands-on learning through PortSwigger Web Security Academy labs and TryHackMe practical cybersecurity labs.
